

Liquid Mineral Health

Tech Data Information

Liquid Mineral Health utilizes natural and renewable source minerals and micro-nutrients.

Liquid Mineral Health when used as specified:

- Supplies the essential elements required for plants' good health and production
- Provide trace elements and micronutrients all plants require for good health
- Low-toxicity ingredient technology with low persistence and residence times
- Creates a longer shelf life in produce with better color and flavor
- Increases the mineral density in crops
- Helps correct the plant balance so that nitrogen uptake is maximized
- **Liquid Mineral Health** has low environmental impact during use and is biodegradable.
