

Sustain Solution

Tech Data Information

Sustain Solution is a unique bio-product which utilizes proprietary natural and renewable source linear polymers. **Sustain Solution** will facilitate, when used as specified:

- Will prevent fungal problems before they become systemic in the plant
- Will eradicate existing fungal colonization
- Promotes a natural and sustainable plant defense reaction to many pathogens
- Induce improved resistance to fungus and nematodes
- Low-toxicity ingredient technology with low persistence and residence time
- Improves the exchange of nutrients through the plant root system
- Improves yield by helping to balance and build porosity in the soil
- A 100% water soluble, anionic liquid that helps encapsulate the root system to prevent fungal and bacterial infections
- **Sustain Solution** has low environmental impact during use and is biodegradable.
